

## NON-AROMATIC BLENDS

NON-AROMATIC TOBACCOS are aromatic only in their own true aroma. Yes, we do add oils, alcoholic essences such as brandy, grain alcohol, rum and bourbon; however, these are added to bring out true flavors of certain tobaccos. Without these additives, most tobaccos are dry and harsh.

### BLEND #71

Pkt. Size. . . . . 7 oz. . . . . 14 oz.

Our second oldest blend...rough cut for slow burning...AA Highland Burley, sweet golden Virginia, Syrian Latakia and burned Cavendish. Take care in packing a rough cut...load your pipe in layers...light your pipe twice...tamp before the second light. Tamp in the middle of your smoke... if your pipe goes out often, pack your tobacco more firmly. Excellent to combine this blend with Blend #255.

### PERFECTION PLUG BURLEY

Pkt. Size. . . . . 7 oz. . . . . 14 oz.

A true "Puritan" cut plug White Burley. Excellent and mild to smoke just as is or can be used as a base to blend your own favorite mixture.

### BLEND #232

Pkt. Size. . . . . 7 oz. . . . . 14 oz.

Our 3rd oldest blend named after address of our first retail store. One night a salesman and I were talking tobacco in the store and we began experimenting with tobacco. I was afraid to use Latakia - since that night, I found out that you can usually make a better blend by adding Latakia. Latakia, Monopoly Turkish and Virginia (golden and red)...a naturally sweet, nutty flavor. Blends such as 232 smoke best in brisk weather and smoke worst on hot humid days.

### BLEND #303

Pkt. Size. . . . . 7 oz. . . . . 14 oz.

Combination of Blend #71 and Blend #232. Created this blend for summer smoking when 232 gets just a little heavy. Burley in the blend 71 smokes extremely easy in the hot summer days.
